

Protect What Matters Most

Your Students and Staff

The rapid global spread of Covid-19 has increased our urgency to protect ourselves and each other. Healthy and safe facilities matter now, more than ever; and no facilities are more important than those serving the education sector, where high numbers of adults and young people congregate in relatively small spaces.

A complete hygiene solution should combine **hand washing, surface sanitisation** and **hand cleaning**.

AeraMax Professional commercial-grade air purifiers provide maximum protection and ultimate peace of mind with **True HEPA filters** that can capture up to **99.97%** of all airborne contaminants, including airborne viruses.¹

- **Protect Against Viruses**
- **Remove Germs, Bacteria, Allergens & VOCs**
- **Improve Concentration and Performance**
- **Reduce Absenteeism**
- **Maximum Protection**

¹The AeraMax Professional Air Purifier was demonstrated to be effective in reducing airborne concentrations of influenza A aerosol in a test chamber, reaching 99.9% airborne virus reduction within the first 35 min of operation.

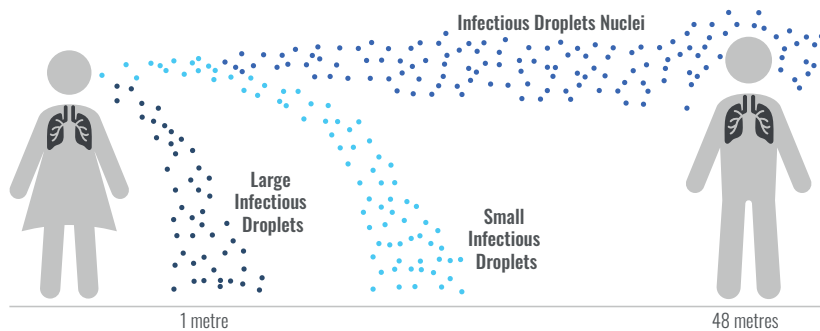

HEPA Filtration and 4-Stage Cleaning

AeraMax Professional Air Purifiers feature a 4-stage filtration system, which has been independently tested and proven to remove 99.99% of the airborne influenza flu virus within 20-35 minutes of operation. It's also good to know that the system includes **HEPA filters**, which have been recently highlighted as being an effective way to remove particles from the air in the **COVID-19 Ventilation Guidance**² published by CIBSE (Chartered Institute of Building Service Engineers).

AeraMax Professional provide maximum protection with filtration technology that delivers smart 24/7 air cleaning for shared environments such as classrooms, changing rooms and eating areas.

Viruses Travel Through the Air Through Coughing, Sneezing and Talking

Cleaner, Safer Environments

With an estimated 22 million days a year lost due to the common cold alone, it is more important than ever to ensure your school provides a safe environment for its students and staff, as all as peace of mind for parents and carers.

By washing hands, sanitising surfaces and cleaning the air, you drastically reduce the chance of person-to-person virus transmission and promote a healthier environment in your school.
