# Temperature Screening Solutions

36.3°C  36.2°C  36.9°C
## Safer
non-contact temperature measurement

## Faster
results with one second per person temperature detection

## Smarter
technology with AI detection greatly reducing false alarms

## With Banner you can secure the right screening solution for your business

### Temperature screening with fast deployment

**Thermographic Bullet/Turret Camera**

- Bullet cameras offer group screening with high efficiency
- Measurement range 30-45 degrees c
- Simultaneous temperature screening for multiple screening (up to 30 people)

Thermographic Handheld Camera

- Check temperatures anytime and anywhere with just one click
- Touch screen
- Measurement range 30-45 degrees c
- Automatic screenshots and uploading

## Fever & Metal Detector Door

- 18 independent detection zones
- Measurement range 30-45 degrees c
- In accordance with the international safety standard, friendly to pregnant woman, people with cardiac pacemaker.

## Temperature screening with access control

**Touch-free, non-invasive access control with temperature measurement**

- LCD touch screen
- Temperature screening of forehead
- Temperature screening with visual results and audio prompt

## Temperature screening with mask detection

### Thermographic Camera & Deep in mind NVR

- Up to 16 channels of face picture comparison
- 32-library capacity with up to 100,000 face pictures in total

# Infrared Thermometers

## 2-In-1 Infrared Thermometer with Probe
- ideal for precise noncontact measurement of surface temperatures
- Probe to be used for core temperature measurements.
- Great for hygiene temperature measuring in food

## Pen type infrared thermometer
- ideal for precise noncontact measurement of surface temperatures
- Pocket size and easy to use

## Slingsby thermometer case
- Keeps thermometer protected and safe

# Pro-Grade Thermal Camera for Smartphones

## FLIR One Pro LT with Micro-USB connection

- Vividir image processing – enhances resolution to help detect problems early
- Connector extends by up to 4mm so you can secure to your mobile device in a protective case
- Features such as multiple spot meters, level/span controls, and reporting through the FLIR Tools Mobile App

# Temperature Check Tablets

**TTS-10** 10.1" panel  **TTS-15** 15.6" panel  **TTS-21** 21.5" panel

## TAURI Series Temperature-Check Tablets

- Provides alerts when people are running high temperature within 1 second
- Non-touch infrared technology
- Multiple devices can be monitored by a single user
